I. HALVÅR 2020

- Værdien af doneret medicin og hospitalsudstyr over 215 mio kr / The value of donated medicine and equipment over DKK 215 million.
- Side 3 og 4 er på engelsk/  
Pages 3 and 4 are in English

## LAGERET PÅ PLADS

## EFFEKTIVE NYE MEDLEMMER

## STAGNERENDE DONATIONER

## LÅN NØDVENDIG

I alt doneret medicin og hospitalsudstyr for 215.189.641 kr siden stiftelsen i 2010.

### MEDICIN OG UDSTYR:

#### GHANA:

Hospitalsudstyr og medicin til hospitaler tilhørende religiøs organisation.

#### RWANDA:

Medicin til hospitaler tilhørende religiøs organisation.

### ØKONOMI:

Udgifterne til transport af den store mængde medicin i 2. halvdel 2019 med fly aht temperatursvingningerne i containerne var så store, at GMA måtte optage kortvarigt lån. Indtægterne må øges, og modtagerlandene betale større andel af fragten. Besparelser ikke mulige, medmindre tilbuddt medicin og/eller udstyr afslås, hvilket absolut må undgås.

### VÆSENTLIGE BEGIVENHEDER:

Intet nyt vedrørende de to lastbiler, der er tilbageholdt i Kiev eller om anklagemyndighedens undersøgelse af det "forsvundne" indhold af to lastbiler doneret til den tidligere præsidents rådgiver. Samarbejdet med Ukraine afbrudt som følge af nye bureaukratiske regler, der langt overstiger, hvad der er acceptabelt for donationer.

Lageret er nu (næsten) bragt fuldstændig i orden, alle effekter er identificeret, gennemgået og stillet på plads, og udkast til EDB program udarbejdet, således at det blot er de nye forsyninger, der fremover skal ordnes.

## VÆSENTLIGE BEGIVENHEDER (fortsat):

### Sidste nyt:

GMA har doneret et stort antal værnemidler til kampen mod Covid-19.

Donationerne til Burundi forventes øget

Se mere på vores hjemmeside  
[www.globalmedicalaid.com](http://www.globalmedicalaid.com)

Det er et kæmpemæssigt arbejde, der er udført af Susanne og Jesper og de kan ikke takkes nok derfor.

Der er også andre, nye medlemmer, der har hjulpet og også disse fortjener tak.

I alt er tilkommel 8-10 nye medlemmer, alle med sundhedsfaglig baggrund og når lageret er fuldstændig bragt på plads, vil disse kunne hjælpe med de mange andre aktiviteter, der er nødvendige for at GMA kan fungere.

Værdien af GMA's donationer har været beskedent, også som følge af covid-19, hvor GMA i øvrigt forærede et stort antal værnemidler til danske læger og tandlæger og udlånte ca. 40 senge og 7-8 respiratorer til 3-4 hospitaler.

I januar foretages kontrolbesøg i Burundi og Ghana. Besøgene var gavnlige og vellykkede – og fremmende for forståelsen af landenes situation – bortset fra et enkelt hopital, hvor der konstateredes utilfredsstillende behandling af det fremsendte udstyr. Forholdet er nu berigtiget, men episoden understreger betydningen af kontrolbesøg, idet det selvagt er nødvendigt, at alt det fremsendte udstyr bruges mest muligt.

Det forventes, at donationerne til Burundi og Rwanda øges, uanset at fragten for en container er mere end 60.000 kr – i stedet for 20.000 kr til kystnære lande – på grund af gode relationer til den nye Præsident og – ikke mindst – en stor mængde værdifuldt udstyr, som GMA har modtaget fra det tidligere hjertecenter i Varde.

GMA er blevet medlem af et konsortium, bestående af forskere fra universiteter i Spanien, Italien og Uganda, der forsøger at finde en metode til diagnostisering af prostata i Afrika tidligere end muligt nu – GMA's opgave er at via det allerede etablerede samarbejde med myndighederne i forskellige lande at udbrede metoden til så mange afrikanske lande som muligt – det forventes, at EU vil støtte projektet med ca 2.5 mio EU.

### Tak til alle, der har ydet en indsats for Global Medical Aid.

Inspektion af hospitalsapotek i Ghana /  
Inspection of hospital pharmacy in Ghana

Hjemmesiden forventes færdigredigeret indenfor 3-4 uger.

Tak til alle, der har støttet GMA.

**Med venlig hilsen  
Hans Frederik Dydensborg**

**INVENTORY SETTLED****EFFECTIVE NEW MEMBERS****STAGNANAT DONATIONS****LOANS A NECESSITY**

Total donated medicine and hospital equipment valued at DKK 215,189,641 since foundation in 2010.

**MEDICINE AND EQUIPMENT:****GHANA:**

Hospital equipments and medicine to hospitals belonging to religious organization.

**RWANDA:**

Medicine for hospital belonging to religious organization.

**FINANCES:**

Expenses for transport of the large amount of medicine in the second half of 2019 via plane, necessary because of the temperature fluctuation in the containers were so big, meant GMA had to take a short loan. The income must be increased, and the recipient countries pay a large part of the freight. Savings not possible unless offered medicine and/or equipment is declined. Something that must be avoided.

**NOTEWORTHY EVENTS:**

No news regarding the two trucks still being detained in Kiev, or regarding the prosecuting authorities' investigation into the "missing" contents of the two trucks donated to the former president's advisor. Cooperation with Ukraine terminated due to new bureaucratic rules that far surpass what is acceptable for donations.

The warehouse is now (almost) fully organized, all items have been identified, inspected and shelved, and an outline for computer program has been created. This will ensure that it is only the new supplies that have to be dealt with.

It is a monumental task, done by Susanne and Jesper, and they cannot be thanked enough for this.

Hospitalsstue i Ghana / Hospital room in Ghana

There are also other, new members, who have helped, and these also deserve gratitude.

## **NOTEWORTHY EVENTS (continued):**

A total of 8-10 new members have joined, all with a health care professional background. When the warehouse is completely brought to order, these people will be able to help with the many other activities that are necessary for GMA to operate.

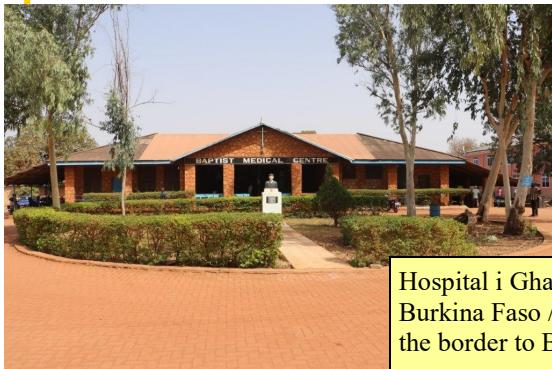

The value of GMA's donations has been modest, in part due to the effects of Covid-19 where GMA donated a large amount of protective gear for Danish doctors and dentists, and lent out approximately 40 beds and 7-8 respirators to 3-4 hospitals.

In January control visits were conducted in Burundi and Ghana. The visits were useful, successful and helped with the understanding of the countries' situation. There was, however one hospital where the handling of the shipped equipment was deemed unsatisfactory. This has now been rectified, but this episode underlines the importance to control visits because it is necessary that all of the shipped equipment is utilized as much as possible.

It is expected that donations to Burundi and Rwanda will be increased even though the shipping cost for a container is more than DKK60,000 instead of the DKK20,000 for coastal countries. The increase in donations is because of the good relations with the new President, and not least because of the large amount of valuable equipment that GMA has received from the former heart center in Varde.

GMA has become a member of a consortia consisting of scientists from universities in Spain, Italy and Uganda who are trying to find a method to diagnosing prostate in Africa earlier than what is currently possible. GMA's task is to, via the already established cooperation with the authorities in various countries, to spread the method to as many African countries as possible. It is expected the EU will support the project with approximately 2,5 million euro.

Website expected completely edited within 3-4 weeks.
